Convergent Photonics Organization Overview Script

Convergent Photonics, located in Chicopee, Massachusetts, is a part of the international Prima Industrie group of companies that develops, manufactures and markets laser systems for industrial applications, as well as sheet metal processing machinery, industrial electronics, and additive manufacturing solutions. As part of the Prima Electro division, Convergent Photonics develops and manufactures industrial laser solutions including CO₂, fiber and Nd:YAG lasers. With a history dating back nearly to the invention of the laser, Convergent Photonics strives to offer high reliability, innovative solutions as a global supplier of photonics technologies as well as high power industrial laser sources for materials processing.
